

Site Plan Key 10/26/21

Property Line is Purple

Green marks existing or proposed restored lawn

Blue is the watercourse behind the property line

The newly discovered wetland area where woodchips are is marked with a red boarder. The wetland area extends out at its widest point approximately 23 feet from property line. The length of wetland area is approximately 45 feet

The area marked Shrub/Wooded area will be approximately 10 to 15 feet from property line. This area will have woodchips removed and restored to previous state "non lawn". Various plants/shrubs from wetland planting list will be replanted using 5 to 10 species of various width and height. The remaining area of wetland will be restored to its previous condition which was grass via a wetland seed mix.

The species will consist of the following based on availability/subject to change:

- Downy Serviceberry
- Shadblow Serviceberry
- Allegheny Serviceberry
- American Cranberry
- Tussock Sedge
- Canada Rush
