MAP CHECKLIST

- 1. MAPS:** All maps must be drawn to scale and should be at 1"=40' or larger. Provide **10 copies** of plans with the following information:
- a. Location map of property (a street map superimposed onto corner of base map).
 - b. Entire property outline, as shown on Tax Assessor's map, with north arrow and scale.
 - c. Existing and proposed contour lines at 2 foot intervals and existing and proposed conditions in relation to wetlands and watercourses and any further activities which may have an impact on wetlands and watercourses.
 - d. Depict all wetlands and watercourses on property as they exist on the site and on adjacent neighboring properties. **Include wetland soils report and field sketch by Certified Soil Scientist.** Wetland flag numbers must coordinate with those in the field and as shown on the site plan.
 - e. Depict all upland review areas on the property (fifty (50) feet from any wetland & one hundred (100) from any watercourse.
 - f. Indicate floodway and 100-year floodplain lines, if applicable.
 - g. Include watershed information and storm drainage calculations, if pertinent.
 - h. Indicate on map closest distance of **disturbance** from wetland/watercourse.
 - i. Location of all significant physical features, such as rock ledges, stone walls, vegetation, trees over 8" diameter nearest the wetland or watercourse. The trees to be removed/affected must be clearly marked on the site plan and flagged in the field.
 - j. Identify vegetation that would be affected by proposal. Include a landscape plan.
 - k. Proposed building site and/or location of any other improvements, such as septic tank, leaching fields, utility lines, proposed fill or excavation areas, tennis court, pool, deck, landscaping and lawn areas.
 - l. Septic system: test pit locations, percolation test results, and Health Dept. approval.
 - m. Location of access routes any machinery will take to reach all areas of activity. Specify types of machinery.
 - n. Sedimentation and erosion controls to stabilize site during and after construction. Provisions for any increase in runoff. Include measures to: prevent pollution or other environmental damage, enhance existing environmental quality, restore, enhance and/or create productive wetland or watercourse resources.
 - o. Name and signature of the individual who prepared map. Indicate date that map was prepared. Include professional seal with date that map/revisions were prepared.
- 2. FIELD WORK**
- a. Flag wetland boundaries and trees to be removed/affected.
 - b. Stake for identification: property lines, driveway & building corners.
